## ONE STONE AT A TIME...

Since opening our doors in 2011, RICHTER STONE has been fully dedicated to client satisfaction. In all that we do, we strive to work meticulously and with integrity in order to provide the highest-quality results in all of our projects.

Founder, Gregor Richter, has been working with stone since the age of thirteen. That passion led to several apprenticeships and a Master Craftsman's Degree from the Stonemason School Demitz Thumitz in Germany.

A second generation German Master Craftsman, Gregor Richter has stone in his blood. From an early age his father impressed upon him the values he still holds true today— that his carving must be done with honesty, integrity, efficiency and precision. The only certified European Stone Master Craftsman in Los Angeles, Richter is uniquely qualified to deliver the highest quality stone & tile work for your next project.
